Croatian Coral Center Zlarin

QnMXjBnV

Entry details

General information

Main country of application	Croatia

Brief description of the project

> The Croatian Coral Center is a unique institution preserving Zlarin's centuries-old coral tradition and immersing new generations and visitors in it through modern, interactive tools such as VR / AR. As a year-round cultural and social hub, the Center contributes significantly to the local economy, enriches the tourist offer, and enhances residents' quality of life. It focuses on educating visitors, including school groups, about heritage, sustainability, and biodiversity, while actively engaging the local community across all age groups. Through national and international partnerships, the Center connects Zlarin with European best practices and serves as a transferable model for sustainable small-island development.

Start date of the project	2023-06-01
Website(s) of the project/nominee	https://hckz.hr/en/o-hrvatskom-centru-koralja-zlarin-english/
Facebook page of the project, if any	https://www.facebook.com/centarkoraljazlarin
Instagram page of the project, if any	https://www.instagram.com/centarkoraljazlarin/
Any other relevant social media	https://www.youtube.com/@hrvatskicentarkoraljazlarin
Does the site or heritage in question have national/regional/ local cultural heritage designation or protection status in its country?	Yes

If yes, please specify:

> Island of Zlarin is listed as a protected cultural heritage site of the Republic of Croatia, and the ancient shipwreck (2nd century BC - 1st century BC), which is exhibited in the museum, is also included on this list. According to the Nature protection act (Official Gazette, no. 80/19, 15/18, 14/19, 127/19) and the Regulation on strictly protected species (Official Gazette, no. 144/13, 73/16), the Red coral (Corallium rubrum) is considered a strictly protected species in the Adriatic Sea.

Is the project focused on or taking place in heritage included on the UNESCO World Heritage List, either as an individual site or as part of a larger World Heritage property? If so, please specify which one.

> No, the project is not focused on or taking place in a site included on the UNESCO World Heritage List. However, it takes place in the Šibenik area, close to two UNESCO World Heritage sites (St. James Cathedral and St. Nicholas Fortress), underlining the area's cultural significance.

Is the project focused on or taking place in a heritage designated as a European Heritage Label? If so, please specify which one.

> No, the project is not located in a European Heritage Label site.

If relevant, is the site/heritage accessible to the public?	Yes

What steps have been taken to ensure that the site / project is inclusive and accessible to as wide an audience as possible?

> The Center is fully accessible. A tracked vehicle assists wheelchair users over stairs. Tactile markings, an elevator, audio guides, and staff trained in sign language ensure inclusion for all visitors..

Concise summary

Concise summary

Croatia has 1 244 islands but only 53 are inhabited. Small island communities face depopulation and limited resources and our island of Zlarin is no exception. In the past, the island thrived thanks to its centuries-old red coral harvesting tradition, which shaped its cultural identity and the life of the local community. It was precisely this rich heritage that inspired the local community to initiate the establishment of the Coral Center.

The City of Šibenik, our local government, recognized this initiative as an opportunity for cultural and developmental growth. The Croatian Coral Center Zlarin project is EU-funded, with a total value of €3.2 million, and it opened in 2023. It is managed by the Public institution Fortress of Culture Šibenik, with ongoing support from the City of Šibenik as founder.

The Center has two main components: an interpretation center and a cultural-social hub. The exhibition is modern, highly interactive, and multimedia-rich, using AR, VR, and other digital tools that immerse visitors in Zlarin's rich historical heritage. Red coral, now a protected species, once again drives the island's development – this time in a sustainable way, without exploitation.

Numerous visitors, including school groups, explore the Center throughout the year (over 36 500 visitors to date). Guided by local experts, they learn about biodiversity conservation, environmental protection, and global ecological challenges.

The Center is housed in carefully restored century-old buildings, where the history of the island comes alive for visitors. Heritage is preserved and valorized for future generations, strengthening the cultural identity of the entire community.

As a cultural and social hub, the Center greatly enhances quality of life on an island with fewer than 300 residents in winter and over 2 500 in summer. Year-round, it offers diverse cultural, educational, and community programs in collaboration with local associations, strengthening social cohesion, inclusivity, and well-being.

It employs local residents and creates new jobs, while its impact reaches national and European levels. The project has a tangible economic and social impact: attracting visitors, extending the tourist season, boosting the local economy, and contributing to the quality of life. Through national and international partnerships, new initiatives are developed, creating additional opportunities. The Croatian Coral Center Zlarin demonstrates how investments in culture and education can revitalize islands, preserve traditions, prevent depopulation, and inspire local communities and visitors from around the world, offering a model that can be applied to other small, sustainable island communities.

Objectives and work undertaken

Aims and objectives of the project/initiative.

The Croatian Coral Center Zlarin is an integrated project with the primary aim of promoting and valorizing natural heritage while strengthening the educational capacities of both local residents and visitors regarding the importance of nature conservation. The project has contributed to the development of modern visitor infrastructure with

innovative features, provided opportunities for interactive participation and education on the protection of endangered species and protected areas, developed interpretive and educational programs for children and youth, and educated the Center's staff, partner organizations, and the local community. Its mission is to preserve and interpret cultural, historical, traditional, and natural heritage while contributing to the sustainable development of Zlarin Island. Its vision is to become the focal point of cultural and social life on the island while educating locals and visitors about the importance of biodiversity conservation.

Any historical and technical research undertaken for the project/initiative.

The project spanned several years prior to the Center's opening and included the restoration of two houses over 100 years old. Extensive historical research was conducted on Zlarin's cultural heritage, focusing on the centuries-old coral harvesting tradition, maritime activities, emigration and local history, forming the basis for the museum concept of the Kažerma house.

Parallel research and consultations with the local community led to the Šare house being designated as a socio-cultural space with accommodation for collaborators, researchers and students — a versatile venue for events, educational programs and residential use.

Monitoring of the coral biocenosis highlighted the need for environmental protection, marine ecosystem preservation, and the vulnerability of Red coral. During the Kažerma restoration, an old wall fresco was discovered, preserved and restored, now displayed at the museum. Remains of a 1st-century shipwreck found on Zlarin's shore were also restored and displayed alongside ceramic vessels and amphorae.

Currently, work is underway to digitize heritage, collecting records from the Croatian Academy of Sciences and Arts and the Croatian Radiotelevision archives. The planned digital archive will be freely accessible to all visitors, particularly benefiting the local community, ensuring Zlarin's cultural and natural heritage is preserved, studied, and shared for future generations.

Activities carried out and stages of implementation of the project/initiative.

The City of Šibenik carried out construction, renovation, and exhibition development before officially handing over the Center to the Public institution Fortress of Culture Šibenik in June 2023. The activities included the complete restoration of two houses over 100 years old, Kažerma and Šare, renovation of the stone street providing access to the houses and restoration of the outdoor terraces. The access road, 420 meters long, connecting the port to the Center, was also reconstructed.

Parallel to these infrastructure works, research activities were carried out, including preparation of the museum exhibition and monitoring of the coral biocenosis to support environmental awareness and conservation. A catamaran was built to support future research collaborations with the academic community. Additionally, specialized equipment was acquired: a tracked vehicle for wheelchair users, mountain bikes and electric vehicles for transport around the island, including one for persons with disabilities.

Since taking over management of the Center, our team has focused on operating and enhancing its activities. Key tasks include welcoming visitors, organizing guided tours and school groups, curating the museum exhibition and developing year-round educational, cultural, and community programs. We also continuously carry out marketing and outreach campaigns to maintain visitor numbers, attract school and group visits, extend the tourist season, and ensure engagement during the off-season.

Challenges or problems encountered and solutions found to overcome them.

Recruiting and training staff was challenging due to limited human resources on the island, so the focus was on educating local residents and equipping them with skills to guide visitors and lead programs. To raise awareness, a comprehensive marketing strategy was implemented, including social media campaigns, partnerships with local tourism boards, and outreach initiatives, boosting the Center's visibility among locals and tourists. As the Center's popularity grew, managing visitors required extended hours and additional staff. To attract visitors during off-peak seasons, the Center organizes educational programs, workshops, and events with local NGOs. It also builds strong

collaborations with local, national and international partners, including schools, associations and tourist agencies, ensuring community involvement, resource-sharing and year-round engagement and support.

European significance

European significance of the project/initiative/nominee.

The Center reflects European significance by showing how local heritage can strengthen a shared identity across borders. The centuries-old tradition of coral harvesting, deeply rooted in Zlarin, is part of a wider Mediterranean heritage also present in Italy, Spain, and other European countries. Red coral, which grows only in the Mediterranean sea, has long symbolized love, loyalty, and the protection of pregnant women and children — universal values that resonate across Europe and beyond. By preserving and reinterpreting this tradition, the Center connects local memory to a collective European one, proving that heritage can inspire unity in diversity. Its modern exhibitions and educational programs attract visitors of all generations, fostering understanding of cultural identity, sustainability, and biodiversity. As a living hub, the Center illustrates how museums can be more than static displays — they can revitalize islands, engage communities, and serve as models of integration, dialogue, and sustainable development for Europe.

Results and impact

Summary of the main results achieved and knowledge that has been gained. List the ways that the project/initiative contributes to the preservation and/or enhancement of the historical, cultural, environmental, educational and/or social values of the heritage in question. Mention the project's impact on conservation policy and practice, if any.

Since its opening in 2023, the Croatian Coral Center Zlarin has achieved significant results in preserving and promoting both cultural and natural heritage. Two historic houses over 100 years old, Kažerma and Šare, were restored, creating a museum and a versatile space for events, educational programs, and accommodation for researchers and collaborators. During restoration, an old fresco and remains of a 1st-century shipwreck were preserved and integrated into the museum exhibition.

The Center has welcomed over 36 500 visitors. While 11 103 visitors participated in 357 guided educational tours, all other visitors receive detailed guides highlighting key exhibits and points of interest, ensuring a rich and informative experience for everyone. In addition, 203 cultural events — including workshops, lectures, concerts, and film screenings—engaged 4 881 participants, particularly during pre- and post-season months. These programs have contributed to a 20% increase in arrivals and a 16% increase in overnight stays on the island.

Parallel activities, such as coral biocenosis monitoring, the development of a catamaran for research and the acquisition of accessible transport and recreational equipment, have strengthened environmental awareness and sustainable tourism practices. The Center has also fostered community involvement, encouraging social inclusion and intergenerational engagement.

Work is also underway on a digital archive, compiling materials from the Croatian Academy of Sciences and Arts and the Croatian Radiotelevision archives. This archive will be freely accessible to all visitors and local residents, supporting long-term preservation, research, and education.

Through these initiatives, the Center has strengthened connections between residents, visitors, and heritage, inspiring active participation in cultural and environmental projects. By integrating historical artifacts, research, and community engagement, the project has created a dynamic, living heritage experience that benefits Zlarin, the wider archipelago, Šibenik, and the county, while serving as a reference model for other small island heritage initiatives.

Aspects of the project that can be considered innovative within its area or field.

The Croatian Coral Center Zlarin is innovative as a living, dynamic interpretation center, rather than a traditional, static museum. It combines cultural heritage, education, and community engagement through a rich, year-round

program of guided tours, workshops, lectures, concerts, and collaborative projects. The Center actively involves local residents of all ages, supporting social inclusion and local initiatives, while also fostering partnerships with Croatian institutions and international networks such as SMILO-Small Islands Organisation. By integrating research, educational activities and cultural events, the Center offers a multi-layered experience that connects visitors to the island's history, traditions, and natural environment. Ongoing initiatives, such as the development of a digital heritage archive, further expand access to knowledge and ensure long-term preservation. Its approach demonstrates a new model for small island heritage management, showing how museums can be active, community-focused and interdisciplinary spaces, influencing both local development and broader heritage practice.

Please provide the following information in bullet points:
Participation in the initiative: Indicate the number of participants, audience members, or users per year. For websites or digital platforms, please include visitor statistics and any relevant data on online engagement or interaction.
Involvement of specific groups: Describe the involvement of youth, local communities, non-traditional audiences, and/or people with disabilities.

- **Overall visits**:
  - 2023: 12 636
  - 2024: 13 187
  - 2025 (first 8 months): 10 733
  - **Total**: 36 556

- **Museum visits**:
  - 2023: 11 344
  - 2024: 11 436
  - 2025 (first 8 months): 8 895
  - **Total**: 31 675

- **Group visits**:
  - 2023: 2 201
  - 2024: 4 486
  - 2025 (first 8 months): 4 416
  - **Total**: 11 103 participants across 288 groups

- **Guided tours**:
  - 2023: 71
  - 2024: 146
  - 2025 (first 8 months): 140
  - **Total**: 357 tours conducted

- **Cultural events**:
  - 2023: 74 events (1 292 participants)
  - 2024: 80 events (1 751 participants)
  - 2025 (first 8 months): 49 events (1 838 participants)
  - **Total**: 203 events with 4 881 participants

- Schools and youth groups
  The Center organizes educational visits for schools across Croatia. Programs are adapted to all age groups and combine guided tours with interactive activities, fostering both learning and awareness about cultural heritage, marine biodiversity and environmental protection. Kindergarten groups from Šibenik also frequently participate.
- Local community and associations
  We actively collaborate with the "Bodulići" association, supporting parents and children with courses and workshops such as painting, ceramics, pilates, dance and guitar lessons, STEM camps, increasingly involving older generations. In partnership with "Tatavaka", we co-organize music festivals such as the "Zlarin street music festival" and "Spread love or keep quiet" and participate in projects on ecology, education, stone wall

restoration, reforestation, and water resource protection. Collaboration with association "KUD Koralj" ensures the preservation of traditional customs. We support the Zlarin Tourist Board by providing spaces for events throughout the year and assist other associations in implementing their projects and programs.

- Academic and cultural collaborations
  The Šare house is available to faculties, artists, and cultural associations for field classes, research, workshops and creative programs. The space serves as a hub for research, creativity and cultural exchange, while allowing the local community to participate, learn and benefit from these activities.
- People with disabilities
  The Center ensures accessibility for visitors with disabilities through adapted spaces and inclusive programs. We provide support and free access whenever needed, allowing everyone to fully participate in educational and cultural activities.

Environmental, social, and economic sustainability of the project (e.g. contribution to climate action and environmental protection; measures to ensure long-term financial sustainability or future viability; benefits for people and communities, where relevant).

The environmental, social and economic sustainability of the Croatian Coral Center Zlarin rests on a carefully balanced combination of education, community engagement and responsible management. A large part of the Center's daily work is dedicated to expert-led tours for school groups, students and organized visitors. These tours are not just informative walks through the exhibition – they are immersive experiences designed to raise awareness of pressing ecological issues. Since opening more than 11 103 participants took part in 357 guided tours, each adapted to age groups and enriched with AR and VR tools, ecological quizzes and interactive installations. Through them, visitors learn about endangered and invasive species, the impact of rising sea temperatures, greenhouse gases, ocean acidification, and noise pollution, but in a way that is understandable, engaging and memorable.

One of the highlights of the exhibition is the kinetic installation "Shared Breath", which comes to life when visitors blow air into a sensor. It reminds everyone that one and a half out of every two breaths we take comes from the sea. In that moment, learning turns into an emotional and unforgettable experience. Similarly, our touch-screen quiz challenges children and adults alike to "help coral grow" by making sustainable choices, making the connection between daily habits and marine health very tangible.

The Center is also a proud signatory of the Plastic-Free Zlarin charter, which has been running for six years on the island. Everything used inside the museum is made of natural materials, while workshops and events often address recycling, reuse, and sustainable living. Although it is difficult to measure the precise contribution to climate action, the impact is reflected in the thousands of visitors who leave the island with a deeper awareness of environmental challenges and their own role in addressing them.

On the social side, the Center designs its cultural and educational program by listening closely to the needs of islanders. This ensures diversity and inclusivity – from concerts and film screenings to pottery classes and ecological lectures – so everyone can find something for themselves. Economically, the souvenir shop with eco-friendly, locally made products has become an important complement to ticket sales, steadily increasing self-revenue and moving the Center toward greater financial independence.

By combining environmental responsibility, social inclusiveness, and economic viability, the Croatian Coral Center Zlarin is not only sustainable today but also building strong foundations for the future.

Dissemination of the project's results and knowledge gained and any outreach or educational activities.

Since its opening, the Center has been featured in over 300 media reports, including local, national and international outlets, as well as radio and television programs across Europe and the UK. Coverage has been overwhelmingly positive, boosting the visibility and reputation of the Center and the island of Zlarin. Our activities are also promoted through social media, with over 1 000 followers on Instagram and Facebook, enabling direct engagement with a broad audience. The Center has received several awards and recognitions, including the "Golden boula" for preserving tradition in a modern way by the County Tourist Board, the designation of the most beautiful building in 2023 by "Jutarnji list" readers and the "Croatian island product" designation from the Ministry of Regional

development and EU funds, highlighting our contribution to cultural heritage. Through media visibility, social media outreach and awards, our project ensures wide dissemination of its results, knowledge and impact.

Contribution to intercultural dialogue and to the protection of cultural diversity.

The Coral Center Zlarin is open year-round, welcoming visitors from around the world, including individual tourists, school groups and organized international tourist visits. We frequently host Erasmus groups in collaboration with county schools and maintain international partnerships through SMILO and other cultural initiatives led by our institution Fortresses of Culture. Beyond the museum space, many collaborations take place in Šare house, which provides flexible spaces for activities while engaging the local community and encouraging museum visits.

The Center preserves, showcases and nurtures local traditions, costumes and customs that are gradually disappearing due to population decline. It serves as a collective memory not only for the people of Zlarin but for the broader Mediterranean region, where coral-related traditions once played an important economic and cultural role. Visitors are often surprised to discover such rich heritage on a small island and compare our exhibitions favorably with museums worldwide.

Transferability of the initiative to other contexts and its scalability potential.

The Center serves as a prime example of how investing in Croatian islands can drive local development, tackle depopulation and enhance tourism. This initiative reflects a successful partnership between local authorities and the European Union, creating long-term, sustainable solutions. The model can be adapted to other regions rich in cultural heritage, demonstrating that such investments can bring positive change even in areas without local government status.

Additionally, the Croatian Coral Center shows how museums can evolve into more than just traditional institutions. They can become vibrant community hubs, centers of education and innovation, playing an active role in engaging new generations and raising awareness on global and environmental challenges. Museums today must go beyond preserving heritage — they should actively interpret it, fostering a deeper connection with both past and future generations while addressing pressing social and environmental issues.

Any related work that still needs to be completed, if applicable.

The Center has the potential to expand its services by opening a hospitality venue, offering a bar and terrace area where simple meals or catering for special events could be provided. This venue could operate during the day and offer a unique atmosphere in the evening, enhancing the visitor experience. Additionally, the Center owns a research catamaran that could be used for tourist routes, offering visitors unique maritime experiences while also serving the local community by addressing the challenge of limited regular ferry services. Future projects include the creation of a digital archive of cultural heritage and the organization of a jazz festival, further enriching the Center’s offerings and cultural impact. These developments would not only increase the Center's offerings but also support the local community and tourism.

Costs of the project/initiative

Costs of the project (in euro), financial and management arrangements, funding partners and/or the type of funding.

The project, valued at €3.2 million, was led by the City of Šibenik, with €1.8 million funded through EU grants. As said beofre, the Croatian Coral Center Zlarin is managed by the Public institution Fortress of Culture, which was established in 2016 and oversees the Center’s operations, ensuring professional management, program development and educational activities.

The Center operates with an annual budget of €240,000, with 55% of expenses covered by its own revenue from museum ticket sales and the sale of locally made, eco-friendly products reflecting the island’s heritage. The remaining 45% is provided by the City of Šibenik in line with the EU-funded project plan.

> While progressing toward financial sustainability, the Center continues to rely on external support. Participation in international projects has opened new opportunities for collaboration and funding, particularly through initiatives focused on preserving traditions and heritage on small islands.
>
> Careful financial management and diversified income streams allow the Center to maintain programs, infrastructure and community engagement, while expanding its impact locally, across the wider archipelago, and internationally.

Funding provided by the European Union or the EEA/Norway Grants (including programme, year and amount of the Grant), if any.

> Fortress of Culture Šibenik has been involved in several EU-funded projects, with a total value of approximately €10 million.
> Some of them are:
> GIFTSnet (2024–2027): Interreg VI-A IPA, €2.2M (EU funding: €1.9M)
> FORTIC (2024–2026): Interreg Italy-Croatia, €2.1M (EU funding: €1.7M)
> Sustainable Fortifications for Seniors Learning Hub (2024): Erasmus+ (EU funding: €60,000)
> FORTITUDE (2020–2022): Interreg IPA, €1.6M (EU funding: €1.37M)
> EMOUNDERGROUNDS (2020–2022): Interreg ADRION, €2.6M (EU funding: €2.2M)
> CONNECTING CINEMAS IN RURAL AREAS: Interreg, €611,455 (EU funding: €489,164)
> KREŠIMIR (2020–2022): European Social Fund, €737,252.18 (EU funding: €626,664.35)
> Erasmus+ Project by Croatian Coral Center Zlarin:
> SMILO (2024–2026): Erasmus+, €87,498 (EU funding: €60,000)
> The Croatian Coral Center Zlarin, a recent addition to the Fortress of Culture Šibenik, aims to achieve financial self-sufficiency. Since its opening, the Center has actively pursued EU funding opportunities in the areas of environmental education, cultural
> heritage preservation and sustainable tourism, with the goal of ensuring its long-term sustainability.

Additional information

How would winning the European Heritage Award / Europa Nostra Award benefit you, your project and/or your organisation?

> Winning this esteemed award would significantly elevate the visibility and recognition of the Croatian Coral Center Zlarin, highlighting our commitment to preserving cultural heritage and promoting sustainability. It would strengthen our credibility, attract more visitors, and positively impact the local community, while also opening doors to further partnerships. Moreover, it would inspire ongoing community engagement and help secure funding for future initiatives, ensuring the long-term sustainability of our project.

In case this submission is the winner of the Grand Prix, what will the monetary award be used for?

> We haven't yet considered the specific use of the monetary award, but our focus would be on something meaningful and long-lasting for the community and visitors. Whether expanding activities, enhancing public spaces, or improving the Center itself, we aim to make a positive, lasting impact for everyone.

In case this submission is the winner of the Grand Prix, who will be the recipient of the monetary award?

> In case this submission wins the Grand Prix, the recipient of the monetary award will be our Public institution Fortress of Culture Šibenik, which will then allocate the funds to the Croatian Coral Center.

How did you find out about the European Heritage Awards / Europa Nostra Awards?	Europa Nostra website

Is this the first time that this entry has been submitted to the European Heritage Awards / Europa Nostra Awards?	No
